

GreenSolutions

Set fork width

- Max. 540 mm

Separating stacks

- Tip forks down slightly
- and engage with care

Do not push Do not pull

- Lift load completely

Block-stacking

- On soft surfaces (such as sacks), use cardboard or plywood dividers

Loading and unloading

- Always load and unload in a systematic manner, one layer at a time, to maintain the load's balance and stability

Avoid spot loads and spot pressure

Beam rack

- Support the span by use of cross bars
